Petroleum Refinery Engineers Visited Speedy Automation

The New State Of Art Concept Loading Metering Skids (LMS)

Endress+Hauser 

Recently a team of Engineers from “National Refinery Limited” visited Speedy Automation to attend an internal seminar on Custody Transfer Systems and for Demo of Endress+Hauser LMS Skid at our head office in Karachi.

A detailed presentation was given on both the old and new technologies in flow measurements. We introduced the Loading Metering Skid (LMS), a certified packaged solution for custody transfer of light hydrocarbons including Gasoline, Diesel, Jet fuel and Marine gas to and from tanker trucks, railcars and ships.

About Speedy Automation

Speedy Automation, exclusive partner of Endress+Hauser in Pakistan for the complete range of product and solutions for the Oil & Gas, Chemical & Petrochemicals Industries.

The skid includes a Coriolis flow meter, batch controller, grounding system, temperature sensor, digital start-stop valve, Y-strainer, isolation valves, frame, piping, an Ex d junction box, and other associated components. The skid is certified for custody transfer per MID Directive 2004/22/EC, Class 0.5.
